Configure iTerm (Colors, Fonts, Transparency, etc)

Configure Atom (Fonts, Themes)

Install Git

<http://git-scm.com/>

Install Node.js

<https://nodejs.org/download/>

(Mac binary 64 bit)

- go to terminal
- cd Downloads
- tar -xzf node-v0.12.2-linux-x64.tar.gz
- sudo mv node-v0.12.2-linux-x64 /usr/local/node
- make sure node is not root protected

Configure Dotfiles

- .bash_profile
- .gitconfig

<https://github.com/coding-house-apr2015/dotfiles>

Close all terminals & atom.

Open iterm

git --version

node --version

atom

A terminal window titled "1. bash" with a dark gray background. The prompt is "chyld@Chylds-MacBook-Pro [~]". The user enters "git --version" and the output is "git version 2.2.1". The user then enters "node --version" and the output is "v0.12.0". The prompt returns to "chyld@Chylds-MacBook-Pro [~] >".

```
chyld@Chylds-MacBook-Pro [~] > git --version
git version 2.2.1
chyld@Chylds-MacBook-Pro [~] > node --version
v0.12.0
chyld@Chylds-MacBook-Pro [~] >
```

Here's the .bash_profile for Ubuntu users

https://github.com/nss-cohort-2014-06-07/ubuntu-config/blob/master/.bash_profile
